

Artist ShawOn

SOFTWARE ENGINEER · DESIGNER · ARTIST

I design products and then build them — most of my work starts in Figma and ends in a front end that ships. Outside that I publish stock graphics as **linearterra**, and I paint, photograph and write as **রাখান**.

Current

Software Engineer

OnnoRokom Projukti Limited · Dhaka

Product design and the build treated as one job — Figma through to the production front end.

- **OnnoRokom ERP** — one system replacing scattered tools; designed in Figma, then built 1:1 from it. Live at onnorokom-erp.vercel.app.
- **Udvash-Unmesh Design System** — tokens, every component with its states, a Storybook and docs so the portal team ships from one source.
- **OnnoRokom HRIS, Udvash-Unmesh app** and e-commerce, and further internal products.
